Summary

Entry-level Data Science professional with hands-on internship experience in Python, SQL, Microsoft Excel, Power BI, data collection, data cleaning, data preprocessing, data extraction, data transformation, exploratory data analysis, and statistical analysis. Experienced in working with structured datasets, preparing analysis-ready data, developing dashboards, extracting insights, and supporting data-driven reporting. Strong quantitative foundation through a B.Sc. in Mathematics (84%) and B.Tech. in Computer Science, with practical experience applying machine learning and analytical techniques to real-world datasets.

Technical Skills

Programming: Python, SQL, Object-Oriented Programming (OOP)
Data Analysis: Pandas, NumPy, Data Collection, Data Cleaning, Data Preprocessing, Data Extraction, Data Transformation, Exploratory Data Analysis (EDA), Statistical Analysis, Data Validation, Feature Engineering
Business Intelligence: Microsoft Excel, Power BI, KPI Reporting, Dashboard Development, Business Analysis, Data Visualization
SQL & Databases: SQL Joins, Subqueries, Filtering, Aggregations, Data Extraction, Data Transformation, MySQL, SQLite, DBMS
Machine Learning: Scikit-learn, Regression, Classification, Clustering, Supervised Learning, Unsupervised Learning, Model Evaluation, XGBoost
AI & Data Science Tools: TensorFlow, PyTorch, OpenCV, NLP, TF-IDF, Streamlit, Flask, Django, REST APIs
Tools: Git, GitHub, Microsoft Excel, Power BI, Version Control

Experience

Data Science Trainee Oct 2025 – May 2026
Softpro India Computer Technologies Pvt. Ltd., Lucknow

- Used Python, SQL, Pandas, NumPy, and Microsoft Excel to collect, clean, preprocess, transform, validate, and analyze structured datasets for data science and reporting tasks.
- Performed exploratory data analysis, statistical analysis, feature engineering, and data validation to prepare reliable, analysis-ready datasets.
- Wrote SQL queries using joins, filtering, subqueries, and aggregations for data extraction, transformation, analysis, and reporting.
- Applied data transformation and preprocessing techniques to identify data quality issues, structure datasets, and support downstream analysis and machine learning workflows.
- Built and evaluated machine learning models using Scikit-learn and analyzed model performance using standard evaluation metrics.

Data Science Intern Mar 2025 – Apr 2025
Gladify Edutech Pvt. Ltd.

- Worked with structured datasets using Python and SQL for data collection, cleaning, preprocessing, exploratory analysis, transformation, and machine learning model development.
- Applied feature selection, data transformation, and validation techniques and evaluated supervised learning models using Precision, Recall, and F1-score.

Projects

Sales & Business Analytics Dashboard Live Dashboard
Power BI, Microsoft Excel, SQL

- Built an interactive Power BI dashboard using 10,000+ sales records to analyze KPIs, sales trends, product performance, and business insights.
- Cleaned, transformed, and prepared source data using SQL and Excel before developing interactive reports and dashboard views.
- Analyzed business performance through KPI reporting, trend analysis, filtering, and interactive data visualization.

SmartHire AI – ML-Powered Applicant Tracking System GitHub
Python, Flask, NLP, Scikit-learn, XGBoost, TF-IDF, SQLite

- Developed an ATS using Python, NLP, TF-IDF, Scikit-learn, and XGBoost for resume parsing, data extraction, job-description matching, and candidate ranking.
- Built a Flask application with SQL-backed data management for structured data processing, skill extraction, resume analysis, and candidate information management.

AI-Based Disease Prediction System GitHub
Python, Django, Machine Learning, Scikit-learn

- Developed a machine learning prediction system using Python with data preprocessing, feature preparation, model training, and model evaluation.
- Integrated the trained model with Django to deliver predictions through a web-based application.

Real-Time Object Detection System GitHub
Python, OpenCV, Deep Learning, Computer Vision

- Developed a real-time computer vision application using Python, OpenCV, and deep learning to detect 90+ object categories from live video.

Education

Bachelor of Technology in Computer Science 2023 – 2026
Integral University, Lucknow **83%**
Bachelor of Science in Mathematics 2019 – 2022
Ayodhya Prasad Mishra Mahavidyalaya, Unnao **84%**

Certifications

Data Analytics | SQL & Relational Databases 101 | Python with Data Science | Microsoft Azure Fundamentals | Data Science Professional
